Warm greetings to everyone.

It is with great pleasure that the Malaysian Society of Intensive Care invites you to join us in this year’s Annual Scientific Meeting on Intensive Care (ASMIC) 2018. The field of intensive and critical care is still considered one of the newer subspecialties. However, new research and knowledge in this area continues to increase rapidly each year. As we mature as an important discipline caring for the sickest patients in our hospitals, it is important to be able to utilise new evidence of care and practice at expected standards. The scientific programme for ASMIC 2018 has been planned to provide the most relevant topics and practice updates in this area and will be delivered by both renowned international and local speakers.

We are also very pleased to be continuing with a separate track for health care professionals who look after the critically ill child in both the paediatric as well as adult intensive care facilities.

We hope you will join us at this meeting and we look forward to welcoming you to ASMIC 2018.

Associate Professor Dr Tang Swee Fong
Organising Chairperson
Annual Scientific Meeting on Intensive Care 2018
PRE-Congress Workshop
20th September 2018 (Thursday)

1. Critical Care Nutrition

This workshop is designed from the most recent available evidence and consensus guidelines. It is intended for all healthcare providers involved in nutrition therapy of the critically ill - primarily, physicians (specialists and trainees), nurses, dietitians and pharmacists.

At the end of this workshop participants are expected to be familiar with enteral and parenteral feeding practices that are evidence-based and promote optimum and efficient energy and protein delivery. By bringing these skills back to the intensive care bedsides, it is hoped that nutrition delivery for the various groups of critically ill patients will be improved leading to better outcomes.

Workshop Instructors
Ahmad Shaltut Othman
Mohd Basri Mat Nor
Noor Airini Ibrahim
Shanti Rudra Deva

0800 - 0830  Registration and pre test
0830 - 0835  Introduction
0835 - 0855  Nutritional status assessment
0855 - 0915  Initiating and dosing EN
0915 - 0935  Monitoring tolerance and adequacy of EN
0935 - 0955  Choosing the appropriate enteral formulation
0955 - 1010  Adjunctive therapy
1010 - 1025  Tea
1025 - 1045  When to use PN
1045 - 1105  Maximizing the efficacy of PN
1105 - 1125  Special Situations 1
Pulmonary failure
Hepatic failure
