Dear Healthcare Professional,

Findings from the Global Nutrition report revealed that children in Malaysia are suffering from the triple burden of malnutrition (stunting, obesity and micronutrients deficiencies). This has dire consequences on the physical growth and cognitive functions of these children.

We recognize your contributions towards improving nutrition and growth of Malaysian children. FrieslandCampina is cordially inviting you to the inauguration of our virtual learning academy. Our academy is designed to provide credible continuous nutrition education for Healthcare Professionals in a modular format.

The modules will be delivered by distinguished experts in pediatric growth, nutrition and developmental domain.
